

Construction Manager (Poland)

*Toto Costruzioni Generali has over fifty years' experience in handling complex infrastructure projects. We specialise in **tunnelling** - using both traditional techniques and TBMs - and in the construction of large **bridges** and **viaducts**, both in Italy and abroad. We create safe, innovative, long-lasting solutions focusing on quality, reliability and technological innovation.*

The Role

We are looking for a Construction Manager for Poland (Łomża).

The Construction Manager guarantees, coordinates and supervises the technical organization of the building site, the execution of the works and other requirements necessary for the correct realization and maximum profitability of the work. Coordinates and supervises the activities of the building site giving the Site Manager appropriate guidelines for compliance with the budget, the work program, the technical and contractual provisions. He is responsible for overall safety of job site including subcontractor, insuring compliance with all safety, fire code and local regulations.

Primary responsibilities

- Together with the Project manager analyse the project and propose technical solutions; analyse and propose make or buy choices.
- Analyse the project to carry out the initial environmental analysis of the site, helping to identify the mitigative measures that the company can adopt
- Collaborate with the Project manager for work scheduling and to prepare the budget by optimizing costs and revenues.
- Monitor the progress of production and the anomalies found by proposing solutions to solve the problems detected.
- Check the progress of the work based on the schedules made
- Prepare everything necessary for the perfect logistics operation of the building site
- Organizing and directing site activities ensuring the implementation of safety and environmental standard

Requirements and skills

- Degree in Civil Engineering or related disciplines/equivalent experience
- Solid experiences in site coordination, supervision, practices and procedures
- Wide experience with complex construction infrastructure projects (highways, bridges, tunnel, etc.)
- Proven experience in managing and directing people
- Demonstrated ability to work under pressure, prioritize and multi-task
- Proficiency in MS Office (Word, PowerPoint, Excel). MS Project is a plus.
- Fluent knowledge of English.
- Italian is a plus.

Location: Łomża (Poland)
